## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Claims 22 and 23 in the reply filed on 11/04/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 6-21, 24-27 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/04/05.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28-33, and 38-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 28 is indefinite as being incomplete for omitting essential structural cooperative relationships of elements between "said drill string", the "couplers", the "hoist means" and the "slip" means", such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Claim 38 is incomplete, because the essential structural cooperative relationships between the system and the "upper slip" is lacking.

Claim 40 is incomplete for omitting essential structural cooperative relationships of elements, between the “upper grip means”, the “lower grip means” and “the coupler”, as in both (e) and (g), the same “lower grip means” appear to function differently, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The recitation in (g) is confusing, since it appears there is a lack of proper punctuation between “a drill string to which said tubular is to be connected” and “lower annular seals”. Furthermore the structural cooperative relationships between the “lower annular” and the system needs to be more positively defined.

Claims 22, 23, 34-37 are allowed.

Claims 28-33 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 38-40 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3672

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
